

Global Programs

La Salle College Preparatory is located in one of the most diverse neighborhoods in the United States. We are a school community that truly embraces diversity and welcomes students worldwide with all backgrounds to join our Lancer family.

The Office of Global Programs is committed to establishing excellent international collaboration and global programs that not only embrace multiculturalism and diversity on campus, but also provide opportunities for our Lancer community to support and learn from one another. In addition, we strive to offer a true 21st-Century education that blends the concept of globalization in our daily teaching and guides our students to look beyond their own culture, ethnicity, and values.

Our office works closely with international students to ensure their success both academically and socially. We provide them concierge services via individualized support and mentorship by the Director of Global Programs, a team of supporting staff, and our teachers. Our goal is to offer international students a memorable and meaningful experience and make La Salle College Preparatory their second home away from their own.

Concierge Services include but not limited to the following :

- Support International students based on their individual needs
- Connect international students with reliable host families
- Conduct individual meetings regularly with international students
- Provide options to help international students overcome language barriers
- Communicate frequently with parents via different formats
- Advise international students on the course and co-curricular activity selections
- Advise international students on the best ways to make use of school breaks and summer vacations

Let's hear from some of our First-Year International Students:

“I am starting my 3rd month as a student here. I've settled in, and everything is going well. Because La Salle is a Catholic school, the campus environment is very different from my previous school in China, but Mr. Mao and my counselor helped me a lot, and I am gradually adapting to this new learning style. My teachers in each subject are also excellent, and my fellow classmates are very kind and friendly. I believe my life as a Lancer student will be better and better in the future.”

- 9th-Grade Boy

“Students in every class are involved and focused, the teachers also care about every student. I believe that I can be a great Lancer in the future.”

- 10th-Grade Girl

"Over the past few months here at La Salle, I have felt extremely welcomed by both students and teachers of the La Salle community. Even though the learning and social environment here at La Salle is different from my school back in Shanghai, I feel at home thanks to my fellow peers. I am looking forward to competing for La Salle's golf team in the spring. Go Lancers!"

- 11th-Grade Boy
