2022 Summer School Course
Schedule, Fees and Information

La Salle College Preparatory is excited to offer a robust offering of summer school courses to incoming, current and non-La Salle students for Summer 2022. As a part of our continuous development of courses and opportunities for current students, we are excited to also offer Pasadena City College Dual-Enrollment courses for current La Salle students.

Below, you’ll find a complete list of our summer school course offerings for incoming and current and non-La Salle students, along with remediation and PCC classes for current students. As you browse through our courses, be sure to take note of the date(s) and time(s) courses are being held. Registering families will be responsible for ensuring courses and programs do not conflict with one another.

Additionally, all summer program registration for incoming, current and non-La Salle students will take place online at lasallehs.org/summer2022. Click on the registration link on this page and complete the required fields and submit payment electronically. Summer courses and programs are being scheduled on a first-come, first-serve space-available basis. Registration will open on Monday, April 25, 2022.

Thank you for your consideration of La Salle College Preparatory for your summer programs! We look forward to welcoming you to campus!

La Salle High School Courses
(5 weeks, Monday to Friday, 10 units, 3hr 15min courses)

• Offered to current or incoming La Salle students. Open to non-La Salle students based on space availability.
• ** Rising 8th grade students may only register for Studio Art and Digital Game Design courses. Note: These are UC approved high school level courses.
• Cost: $800.00 per year-long course

Pasadena City College (PCC) Dual-Enrollment Courses
(Please see below regarding schedule) All PCC courses will be held at La Salle College Preparatory’s campus

• No costs to La Salle students who register through La Salle
• Offered only to current La Salle Students
• PLEASE NOTE for Students Enrolled in the PCC Dual Enrollment Courses, the dates for Summer School are June 06–July 15, 2022
• Please see details below regarding days/times of the class

High School Remediation Courses
(Please see below regarding schedule)

• Offered only to current La Salle students
• English and Religious Studies remediation offered in-person
• All other remediation courses are completed remotely. La Salle will arrange your enrollment
• Cost: $400.00 per EACH semester course--i.e. if a student has 2 semesters of English to complete, the cost is $800

La Salle Summer School Contact Information

Mrs. Julia Frisina, Summer School Coordinator
(626) 696-4420 • summerschool@lasallehs.org
Algebra 1
A graphing calculator is recommended. This course covers the order of operations, basic properties of addition, subtraction, multiplication, and division of real numbers. It addresses solving linear and quadratic equations, inequalities, and proportions. Functional notation and functions are explored. Expressions involving exponents and exponential functions are covered including exponential growth and decay functions. Adding, subtracting, multiplying and dividing rational expressions as well as solving rational equations are included. Square roots and methods for solving radical equations are studied. Concepts involving geometry, probability and statistics are also touched on.

Geometry
A graphing calculator is recommended. This course covers concepts involving reasoning and proof using conditional, bi-conditional statements, and inductive and deductive reasoning. Topics including perpendicular and parallel lines, angles, and triangles are covered. Students learn congruence postulates and congruent and similar triangles as well as the classification of different types of triangles and properties of triangles, parallelograms, and quadrilaterals. Various types of polygons, including similarities of polygons, are investigated. Transformations in the plane are explored. Right triangles and trigonometry, as well as circles, are significantly studied. Areas of polygons and circles, plus surface area and volume, is covered.

Algebra II
A graphing calculator is required. This course covers the operations of real numbers. It addresses solving linear equations and inequalities and absolute value equations and inequalities, which includes slopes and rates of change. Students learn methods for solving systems of linear equations in two and three variables. Methods for graphing and solving quadratic equations, including the topic of complex numbers, are covered. Students learn how to find the rational zeros of polynomial functions. Exponential and logarithmic equations, rational equations and functions, and quadratic relations and conic sections are explored. Students also explore sequences and series, probability and statistics, trigonometric ratios and functions, and trigonometric graphs, identities and equations.

Precalculus
This course consists of a review of algebraic functions and a study and analysis of polynomial, rational, exponential, logarithmic, and trigonometric functions. Conic sections are included in the study of topics from analytic geometry. Linear systems of two and three variables are solved and introduced as matrices. Additional topics of trigonometry are evaluated with identities and vectors. The course ends with an introduction to the topics of Calculus.

Digital Game Design**
Digital Game Design focuses on developing students’ skills in creative and critical thinking, collaboration, and communication, as well as design and foundational programming principles by offering an interdisciplinary approach to the subject of game design and programming. This course introduces the student to foundational elements in video game design, creation, and distribution. Created products will include 2D/3D video games through the use of GameMaker Studio 2.0 and Unity. Students are also introduced to the fundamentals of computer programming and coding via GameMaker Studio 2.0.

Studio Art 1**
This course is an opportunity to fulfill a requirement in a fun and new way, making art. Rooted in the formal elements of art, students will explore drawing, painting, and sculpture, while addressing aesthetic, technical, and expressive uses of materials. Projects present visual problems while addressing social issues and cultural themes, giving students opportunities to express their experiences, opinions, and ideas and create artwork that follows their individual areas of interest.
Art Portfolio
This course is designed for students who need to further develop their artistic work and build a portfolio for submission to a four-year art program in college. As such, it has two topic areas. The first and largest focus area guides students in a studio setting where they, working in a medium of choice, create and consolidate a body of representative work that will comprise an art school admissions portfolio. They also learn how to write an artist’s statement, as well as how to document their work photographically and thereby create a digital portfolio. The teacher works individually with students, instructing them in new technical skills and the use of new materials. The second topic area is a series of in-class visits from professional artists and art school representatives. Each artist and peer will facilitate a student review and critique each other’s body of work.

World History
This course covers the era of the Rise of Nations. This survey course aims at helping the student develop an understanding and appreciation of the different historical stages in the development of the modern world. The ideas brought out by the Renaissance, Reformation, Age of Exploration and Discovery, Scientific Revolution, Absolutism, Enlightenment, and the Industrial Revolution are discussed. In addition, this course examines the Age of Imperialism at the turn of the century with emphasis on shifts in world power, World War I, the Russian Revolution, and the cooperation and division that brought change and conflict to the modern world. This course concentrates on an analytical and critical thinking approach to world history.

PCC Dual Enrollment Courses
June 6 – July 15, 2022

GLBI 001: Intro to Global Studies • Classes meet on M, Tu, W • 9:00am - 11:50am
This a College Level Course.
The course focuses on the study of globalization and related forms of social change. Analysis of economic, political, military, cultural, technological, and environmental aspects of globalization, history of globalization, European colonialism, and decolonization process; impact of multinational corporations and global political and financial institutions, and social movements from cross-cultural and global perspectives.

HLC 101: Intro to Health Sciences • Classes meet on M, Tu, W | 12:00-2:50pm
This a College Level Course.
The course is an introductory course for students interested in pursuing a health-related career, but are still exploring and have not yet decided on a specific career. Information on career preparation and development, survey of the health professions, culture for health professionals, requirements for education, job and market demand in selected health careers, health promotion, goals, history, and development.

On-Campus Remediation Courses
June 13 - July 1 | 9:00 am - 11:00 am

Religious Studies
Open to current La Salle students only.

English Remediation
Open to current La Salle students only.
Welcome to La Salle Lancer Athletics!

During the summer, students can participate in a variety of sports as they prepare for the upcoming seasons. Below, you will see those sports that are offered during the summer, including the dates, times, and locations of our summer camps and practices. You can also visit our website, www.lasallehs.org, to get more information regarding our athletic program. If you have any questions regarding these particular programs, feel free to contact the coach. We realize that some of you have already made vacation plans for the summer. In addition, we also realize that there might be some minor scheduling conflicts between some programs. Please communicate these plans and/or conflicts with your coaches in order to avoid any confusion regarding their commitment. Please note that incoming students may not participate in any summer programs until they have completed their current school year.

Athletic Clearance

All student-athletes must be cleared online prior to participation in any sport. Please register your student at www.AthleticClearance.com for the 2022-2023 school year beginning May 15th. All individuals who enroll in the summer program will receive a follow-up email with more details.

Physicals

Join us on June 11th and July 9th in the La Salle PE and Band Rooms for the annual summer physicals. With a convenient location and qualified physicians, it’s hassle free! The cost is $20. Please note that all student-athletes are required to submit an updated physical each year and all physicals are only valid 12 months from when the last exam was administered. Contact Athletic Trainer Sam Orefice for more information at sorefice@lasallehs.org.

Parent Meeting

All parents of students planning to participate in any fall sports (Cheer, Boys’ & Girls’ Cross Country, Football, Girls’ Golf, Girls’ Tennis, Girls’ Volleyball, Boys’ Water Polo), there is a mandatory parent meeting on Thursday August 11th, 2022 @ 5:30pm. Make plans to be there to get all the pertinent information related to the upcoming season including athletic department policies, team specific policies, spirit packs, important dates and more. Please note that some programs may have additional parent meetings prior to this date.

Summer Camp Enrollment Information

Please visit www.lasallehs.org/summer2022 to register for the High School Team Camps. La Salle reserves the right to cancel any course or camp due to under-enrollment (fewer than 10 students) up to one week prior to the beginning of the camp. A refund check will be issued in full. Camp date, times, and locations may be adjusted to accommodate staffing, facilities, and other issues.

Junior High Athletic Clinics $150

Our Junior High Athletic Clinics (Grades 6-8) are designed for athletes looking to hone their skills in a specific sport. The individual camps are staffed by La Salle College Preparatory coaches, and are dedicated to developing the fundamentals within each specific sport. All athletes regardless of talent level will learn new skills as well as vital life lessons such as respect, sportsmanship, teamwork, and self-discipline. Camp will be canceled if under 10 students register. Refunds will be issued.

La Salle High School Team Camps

Our La Salle High School Team Camps (Grades 9-12) are recommended for all Lancer student-athletes who plan on participating on a Lancer team in the coming year. Summer is the time to work on specific fundamentals, conditioning, strength-training, and team schemes. In addition, these camps allow our potential team members compete in the off-season, unify as teams, and prepare for their upcoming seasons.
